Tajammul bhai,

Who is the domain owner for khalifatullahmehdi.info? It looks like they are trying to move the domain to a different hosting site.

Ok great. Thanks for the clarification. As long as we have the domain under control, they would not be able to disrupt.

+64 21 502 973 ~Noor

I believe its developed using asp.net

12:01

acha

12:01

when you say you have downloaded site contents, what files are they?

12:01

+1 (646) 385-0266 ~@Mukarram

All pdf documents and books that were on the site

12:04

We have the Administration in our control so the source code should still be accessible

12:07

do we have a temporary content ready to display on the website that states that this website is being worked upon??

12:10

+1 (646) 385-0266 ~@Mukarram

Just saw the email in my inbox that munnawer sent.

12:11

The link is now dead probably as we moved the host

12:11

Tajammul bhai, can we send an official email from the team email advising the subscribers to discard any unauthorized emails on behalf of the team?

12:12

I can draft the communication and send your way

12:13

+64 21 502 973 ~Noor

i have hosted a single page on <https://khalifatullahmehdi.azurewebsites.net/>
If content is ready, i can put it on that page and use the DNS we have to get the site up and running instead of showing 404

12:18

+1 (646) 385-0266 ~@Mukarram

We should clean the contents that were added before bringing the site back online

12:19

The conformity principle etc

12:20

But I agree a maintenance page should be put up instead of routing to the error

Have added this content as the maintenance page. If this is sufficient, we can host it on the domain right away until the actual website is ready to go live

I have an humble suggestion.

It is not recommended to leave the domain without a maintenance page. This will make the domain vulnerable for a subdomain takeover hijack.

Especially when there is another party interested in the same high valued domain name.

Read about it here:

Ok. If it's just the one page that shows up and does not impact the site itself when migrated then let's put the maintenance page up.
